Traditional to Digital Shift

1

Evolution of Car Buying Process

Consumer journey has transformed from physical showroom visits to online search, with digital touchpoints becoming the first step in vehicle purchasing decisions.

2

Social Media as Automotive Showrooms

Platforms now serve multiple functions beyond networking, becoming virtual dealerships where consumers discover, evaluate, and engage with automotive brands 24/7.

3

Storytelling Replaces Technical Selling

Marketing approaches have shifted from specification-focused advertising to authentic narratives that build emotional connections and foster brand communities among potential buyers.

Research Problem

Bridge the gap between local automotive industry and young car enthusiasts (Age 18-35) through effective, specialized digital engagement and creating unique marketing opportunity that remain highly untapped in Sri Lanka.

Main Objective

To develop an intelligent, effective web application with one click connecting local garages and car enthusiasts.

Overall System Diagram

Research Focus & Gap Identification

Digital engagement gap

Limited online presence

Local garages lack digital visibility, making it difficult for enthusiasts to discover specialized automotive services.

Untapped market potential

Young car enthusiasts represent significant marketing opportunity that remains underserved in Sri Lankan automotive industry.

Disconnected communities

Car enthusiasts struggle to connect with qualified local service providers for specialized specialized vehicle needs.

Trust barriers

Absence of reliable review systems prevents quality assessment of garage services for potential customers.

Young car enthusiasts

Age 18-35

Primary target demographic with growing interest in automotive customization and digital solutions.

Untapped Market

Significant opportunity in Sri Lankan automotive sector for specialized digital marketing and services.

Digital Engagement

Connecting through social media platforms and interactive web application features.

Enthusiast Preferences

Focus on classic cars, sports modifications, and performance customization services.

Untapped marketing opportunities

1

Digital engagement gap

Young enthusiasts disconnected from local automotive services despite high interest in car culture.

2

Specialized services

Restoration and modification services lack visibility despite growing demand among 18-35 demographic.

3

Trust building

Ratings and reviews system creates transparency in transparency in previously word-of-mouth dominated industry.

4

Market expansion

Connecting enthusiasts with specialized garages creates new revenue streams for local businesses.

Research Novelty Component

Create a recommendation system to connect local garages with their specialty and car enthusiasts using machine learning for profiling and matching.

Proposed System

Dream Drive Application

Web platform connecting car enthusiasts with local garages through one-click service matching.

Service Categories

Specialized garage listings for performance, painting, engine repairs, interior design, maintenance, wheel alignment, car care and accident repairs.

Quick Recommendations

Matches users with nearby garages within 1-2 minutes based on location and requirements.

Target Audience

Young car enthusiasts aged 18-35 seeking specialized automotive services.

Service categorization

Performance and Customization

Specialized modifications for enhanced vehicle performance and unique customization options.

Tinkering and Painting

Body repair services and professional painting for aesthetic improvements.

Engine Repairs

Comprehensive engine maintenance and repair services for all vehicle types.

Interior Design

Custom upholstery and interior modifications for enhanced comfort and style.

Quick recommendation system

Fast garage matching

System recommends nearby garages within 1-2 1-2 minutes based on customer requirements. requirements.

Location-based search

Uses customer location and Google Places API to API to find convenient service options.

Quality filtering

Incorporates ratings and reviews to ensure customers connect with trusted garages.

Service categorization

Matches customer needs with specialized garage garage services for precise recommendations. recommendations.

Specific Objectives

Increase customer base

Wider Reach

Connect with more potential customers through digital platform visibility.

Targeted Marketing

Attract specific customer segments based on service preferences and location.

Enhanced Visibility

Help garages showcase specialties to relevant audiences seeking specific automotive services.

Customer Retention

Build loyalty through ratings, reviews and consistent service quality tracking.

Create automotive marketplace

Connect Buyers and Sellers

Facilitate transactions between car enthusiasts and garage owners through integrated marketplace features.

Parts Exchange Platform

Enable trading of automotive parts, accessories, and specialized equipment within the Dream Drive community.

Allow customers to post projects while garages compete with quotes and portfolios.

Service Bidding System

Feature completed classic and sports car projects to attract enthusiasts and potential clients.

Restoration Showcase

Methodology

Data Collection Techniques

01

Online Surveys and Questionnaires

Surveys will be distributed to young car enthusiasts through google forums and social media groups to collect data on preferences and behaviors.

02

Social Media Analytics

Analysis of engagement metrics across platforms to understand how young consumers interact with automotive content and identify trending topics and influencers.

03

Focus Group Discussions

Structured conversations with selected participants to obtain qualitative insights into motivations, perceptions, and decision-making processes regarding automotive interests.

Tools and Techniques

Hardware & Support

- High performance Laptop/ PC
